

OSVID Platform Audit & Testing Manual

Complete Technical Inventory, Architectural State, and End-to-End Verification Guide

Platform: Next.js 16 (App Router) • Google Firebase • **Local Dev Host:**
Paystack <http://localhost:8080>

Status: All 36 Routes Verified &
Compiled

1. What Has Been Built & Wired

The OSVID Chemicals web application has been completely migrated to a custom, full-stack Firebase architecture, replacing all legacy Wix dependencies with Google Firestore, Firebase Authentication, Cloud Storage, and Paystack payments.

A. Public Storefront & Customer Experience

ROUTE / URL	FEATURE CAPABILITY	ARCHITECTURE & DATA LAYER
/ (Homepage)	Hero showcase, category navigator, featured products, values, testimonials, blog highlights.	Firestore client layer (lib/firebase/storefront.ts) with dynamic result parsing.
/shop	Full chemical catalog, category filter chips, search query input, price sorting, quick-add.	Reactive Firestore queries with zero-item empty state and error retry callouts.
/shop/[slug]	Product details, high-res image zoom, stock tracker, Back-in-Stock lead capture.	Document query by slug; submits lead alerts to back_in_stock_requests.
/cart	Persistent cart drawer and full-page review, quantity controls, dynamic NGN calculations.	Context-driven state (providers/CartProvider.tsx) with local sync.
/checkout	Multi-step checkout, shipping address collection, coupon engine, Paystack inline gateway.	Paystack pop-up integration; server-side verification with stock auto-decrement.
/about	Corporate history, mission & vision, dynamic executive leadership team roster.	Firestore teams collection with static fallback data structure.
/services & /services/[slug]	Chemical & industrial application services catalog and technical inquiry scopes.	Firestore services collection.
/blog & /blog/[slug]	Technical blog directory, category tags, author cards, related post recommendations.	Firestore blog_posts collection.
/contact	Direct contact & technical lead capture with email, phone, and WhatsApp integrations.	Saves directly to Firestore contact_submissions with toast feedback.
/account/orders	Customer order receipt tracking, delivery status indicator, tracking numbers.	Filtered Firestore orders query by user UID and email.

B. Tenant Operations Dashboard & Governance

DASHBOARD ROUTE	MANAGEMENT CAPABILITY	ACCESS ROLE
/dashboard	Executive overview, gross revenue stats, active order feed, low inventory alerts.	Admin & Managers
/dashboard/products	Product catalog management: Add/Edit products, adjust price/discounts, update inventory.	Admin, Inventory Manager
/dashboard/orders	Order status updates (Pending → Processing → Shipped → Delivered), tracking codes.	Admin, Order Manager
/dashboard/customers	Customer directory with total spent, order volume, and contact info.	Admin, Customer Manager
/dashboard/discounts	Promotional coupon engine: percentage or fixed discounts, minimum spends, expiry.	Admin, Marketing Manager
/dashboard/managers	Staff access governance: Create staff accounts with granular module permission switches.	Admin Only
/dashboard/super-admin	Platform governance hub: Live license countdown, remote app killswitch, term extender.	Super Admin Only

2. Step-by-Step User Testing Guide

Follow this plain-English, click-by-click verification workflow on your local environment (<http://localhost:8080>).

Test 1: Storefront & Catalog

Storefront

<http://localhost:8080/shop>

Expectation: Immediate product loading with functional category filters and search.

1. Navigate to /shop in your browser.
2. Click category chips (e.g. *Adhesives*, *Epoxy Flooring*).
3. Observe the product cards filtering instantaneously.

Test 2: Cart & Drawer Calculations

Shopping

<http://localhost:8080/shop>

Expectation: Instant drawer slide-out, smooth quantity increment/decrement in NGN.

1. Click **"Quick Add"** on any product card.
2. Notice the green *"Added to cart!"* Sonner toast.
3. Click the **Cart Icon** in the top header.
4. Click + and - to verify dynamic subtotal updates.

Test 3: Paystack Checkout Flow

Payments

<http://localhost:8080/checkout>

Expectation: Seamless payment popup and automatic inventory decrement.

1. Fill out customer name, phone, and delivery address.
2. Click **"Continue to Payment"**.
3. Click **"Pay with Paystack"** to trigger test modal.
4. Select **Success** → order writes directly to Firestore.

Test 4: Contact & Lead Inquiries

Forms

<http://localhost:8080/contact>

Expectation: Direct document persistence to Firestore with user confirmation.

1. Enter your name, email, subject, and message.
2. Click **"Send Message"**.
3. Verify the green success confirmation toast.

Test 5: Super Admin License Extension

Governance

<http://localhost:8080/dashboard/super-admin>

Expectation: Real-time Firestore write adjusting subscription expiration.

1. Log in as Super Admin & open Super Admin Governance.
2. Click **"Manage License Term"**.
3. Click **"+90 Days"** and confirm with **"Save"**.
4. Observe the countdown updating immediately.

Test 6: Remote App Suspension Barrier

Killswitch

<http://localhost:8080/dashboard/super-admin>

Expectation: Un-bypassable lockdown barrier shown across tenant screens.

1. Click **"Suspend Business Portal"** & confirm.
2. Log in as tenant admin → observe full-screen lockdown.
3. Click **"Reactivate"** from Super Admin to unlock.

Production Verification Passed: Static TypeScript compilation confirmed 0 errors (`npx tsc --noEmit`) and all 36 production routes compiled cleanly (`npm run build`).
